Milk Replacer for Young Calves Through Weaning

Purina® 24:20 Calf Milk Replacer (Medicated) is a complete and balanced formula featuring 24% protein, 20% fat to support optimal growth and performance.

Formulated With Easily Digestible All Milk Proteins

A high protein formula helps provide the necessary energy young calves need to thrive.

Support for Newborn Calves, Beginning at Birth

Formulated with prebiotics to support digestive health. Added vitamins and minerals help to support immune health, helping set the stage for a strong start at life.

Highly Palatable

Specifically formulated with a proprietary blend of herbs and natural flavors to encourage feed intake in newborn calves to ensure they receive proper nutrition.

Type C Medicated Feed

Medicated with Lasalocid for the control of coccidiosis.

DIRECTIONS FOR USE

Detailed feeding and mixing instructions can be found on the back of the package. Intended for use in calves from Day 2 to Weaning.

TYPE C MEDICATED FEED

FOR CONTROL OF COCCIDIOSIS CAUSED BY EIMERIA BOVIS AND E. ZUERNII IN REPLACEMENT CALVES
