Vitamin A, (min)	5,000 IU/lb		

### Ingredients\*:

Wheat Middlings, Wheat Red Dog, Ground Soybean Hulls, Corn Distillers Dried Grains with Solubles, Cane Molasses, Calcium Carbonate, Dehydrated Alfalfa Meal, Dehulled Soybean Meal, Ground Corn, Ammonium Chloride, Salt, Yeast Culture, Colored with Iron Oxide, Vitamin A Supplement, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Vitamin D<sub>3</sub> Supplement, Cobalt Glucoheptonate, Vitamin E Supplement, Zinc Oxide, Cobalt Carbonate, Manganese Sulfate, Ethylenediamine Dihydroiodide, Zinc Sulfate, Sodium Selenite, Basic Copper Chloride.

\*Ingredients differ by manufacturing plant.

Net WT. 50 lbs (22.67 kg) Item Number 3009591-201/206 Formula Code: 55LX

### **Directions:**

Feed at a rate of 1.67 lbs to goats/kid weighing 50 lbs to provide 22.7 mg decoquinate per 100 lb of bodyweight (0.5 mg/kg) per day. Feed at least 28 days during period of exposure to coccidiosis or when it is likely to be a hazard. **Warning:** Do not feed to goats producing milk for food.

#### Important:

- Start kids on colostrum milk from birth to 3 days of age; feed Land O'Lakes®
   Doe's Match® Kid Milk Replacer or Purina® Goat Kid Milk Replacer from 2 days until
   4-8 weeks of age.
- 2. If kids have not been creep fed or they were purchased, then they should be placed on grass hay on a free-choice basis after arrival.
- 3. When making a ration change, allow 7 to 10 days for animals to adjust to the new ration.
- Keep a constant supply of complete feed available. Do not let fine material accumulate in feeders
- Provide adequate bunk space for each animal. Bunks should be well-protected and well-managed to prevent feed from becoming wet or moldy.
- 6. Provide a source of fresh, clean water at all times.
- 7. Feed Purina® Goat Mineral free-choice.
- 8. Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control. In groups of goats there are certain animals that experience chronic bloat, or other digestive disturbances and consequently, are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly managed feeding practices, can increase the incidence of bloat in all goats. If bloating occurs, the above management practices should be reviewed and your veterinarian consulted.

#### Caution:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.

This product contains copper and should not be fed to sheep. Bentonite should not be used in decoquinate feeds.

USE ONLY AS DIRECTED.
