

LAND O LAKES® Electrolyte Complete-RM

Provides nutritional support for calves

- ✓ A registered material under the Washington State Department of Agriculture Organic Food Program and is approved for use in organic production and handling
- ✓ Formulated to meet electrolyte standards set by university experts to assist with heat stress and scours

Available in a 25-lb. bag

Animals, like humans, are made mostly of water

When calves experience dehydration and electrolyte loss, these imbalances must be addressed quickly.

LAND O LAKES® Electrolyte Complete-RM is designed to:

- Address dehydration early
- Support calves experiencing heat stress
- Provide nutritional support during health challenges
- Assist with optimal intake

Features	Benefits
Sodium bicarbonate	Supports optimal pH balance and hydration
High dextrose	Provides quick energy
Vitamin B complex	Supports intake
Zinc	Supports immune function and tissue health
Malic acid	Helps reduce the potential for excess D lactic acid ¹

Feeding considerations:

Provide LAND O LAKES® Electrolyte Complete-RM in between milk feedings. Do not mix LAND O LAKES® Electrolyte Complete-RM with milk or milk replacer.

Feed 2 quarts of LAND O LAKES® Electrolyte Complete-RM per 100 pounds of body weight every 6-8 hours. If using for heat stress, mix a more dilute solution (according to directions) and provide free choice.

Always provide fresh, clean water beginning on day two.

*Always follow label directions.

Let's talk about a calf program to meet your farm goals.
