

Purina® UltraCare® Early Edge™ Complete Feed

Give an edge to lightweight or challenged weaned pigs

Purina® UltraCare® Early Edge™ complete feed is formulated to encourage feed intake and optimize performance for pigs weighing less than 10 pounds.

Life Stage	Feed Type	Feed Format	Packaging
Starter	Complete	Pellet	Bulk, bag*

Great starts depend on early and consistent feed intake. Purina® UltraCare® Early Edge™ complete feed gets small pigs eating with:

- Lactose**
to minimize transition stress from sow's milk to dry feed
- Enterid® feed additive**
to address intestinal challenges and support an optimal gut microbiome
- Outpace® feed additive**
to support performance during periods of stress
- Intake-enhancing technology**
to increase palatability and help to create robust eaters
- Gut-optimizing technology**
to support gut health and digestive efficiency
- Organic selenium**
to optimize pig performance

Use Purina® UltraCare® Early Edge™ complete feed to give underperforming weaned pigs the health and performance benefits of early, consistent feed intake.

Consistent feed intake supports immune system development during the weaning transition period, a time when pigs are exposed to multiple stressors and are particularly vulnerable to disease. **A healthy, well-developed gut functions as a barrier to disease** in the nursery and in subsequent production phases.

Robust feed intake is crucial for optimal growth post-weaning. End-of-nursery weights are a strong predictor of finishing weights. Research at the Purina Animal Nutrition Center indicates that every **1-pound difference at day 32 post-weaning correlates to a nearly 2.1-pound heavier pig at finishing.**¹
