Purina® Proof Pays Feeding Trials

National Data: Replacement Animals

Test your replacement heifer and breeding bull feeding program

The results below showcase many producers' feeding trials across the United States, testing feed for their replacement animals.

	ACCURATION® RANGE SUPPLEMENT		ACCURATION® GROWER SUPPLEMENT
	Developing Heifers ¹	Developing Bulls ²	Developing Bulls ³
NUMBER OF FEED TRIALS :	45	109	67
NUMBER OF HEAD :	2,911	5,755	3,071
AVERAGE DAILY GAIN :	2.25 lbs	3.42 lbs	3.94 lbs
FEED EFFICIENCY, DM BASIS	6.42	6.24	4.78

Providing quality nutrition for breeding bulls and replacement heifers allows them to fully express their genetic potential. It also gives your heifers a better chance to stay in the herd longer. The Purina® All Seasons™ Cattle Nutrition Program is designed to support more heifers bred in the first 60 days post-calving.

1. Feeding trials with heifers averaging from 630 lbs. to 871 lbs.*
2. Feeding trials with developing breeding bulls averaging from 691 lbs. to 1,093 lbs.
3. Feeding trials with developing breeding bulls averaging between 705 lbs. and 1,107 lbs.

*Weight ranges rounded from trial data averages for clarity of reporting
