For Easy Keepers and Other Horses in Need of Low Starch and Sugar Forage

Purina® Forage Timothy-Teff Pellets are designed to provide a low starch and sugar roughage option for horses with limited or no access to pasture, horses with sensitivities to non-structural carbohydrates, and horses with challenges consuming long stemmed forage.

Timothy & Teff Grass

A diverse blend of forages to mimic grazing

Omega-3 Fatty Acids

Guaranteed levels from flaxseed to help support overall wellness

Natural Vitamin E

For added antioxidant and immune support

Low Starch & Sugar

Formulated for horses with sensitivity to non-structural carbohydrates

Limited Ingredient Formula

formulated without soy, grain, molasses or binders

Soaks Fast & Supports Hydration

These pellets soften quickly in water and make a soft mash that's easy to chew and helps water intake

DEVELOPED BY PhD EQUINE NUTRITIONISTS

Featuring

EasySoak™
PELLET TECHNOLOGY

EASYSOAK™ pellet technology means this product is specially formulated to soak quickly, saving you time. When soaked, these pellets help support the horse's hydration and become soft and easy to chew.

Feeding Directions

For horses consuming long stemmed forage, Timothy-Teff Pellets may be fed in addition to the regular feed ration. Adjust the amount fed depending on activity level and body condition of the horse.

This product may also be used as partial or total forage replacement (e.g., horses with limited/no access to pasture, when a low starch and sugar forage is recommended, horses with poor dentition, etc.). Ideally, horses should be fed 1.2 – 2.5% of their body weight in total forage per day. If appropriate, a portion of the horse's diet should include long stemmed roughage to help reduce boredom and stall vices.

For hydration, aggressive eaters, or for horses with dental concerns, soak pellets in water using a minimum of 3:1 ratio (3 parts water to 1 part pellets). Allow pellets to soak until they reach your preferred consistency before feeding. For best soaking results, soak pellets in warm water (100 °F).
