## FEEDING DIRECTIONS

Blend the HSC Poultry feeds in 20-lb batches according to the tables below.

*Note: A 20-lb batch is not indicative of the amount of feed your birds will eat during that period. Birds may require more or less than 20 lbs of feed each week based on flock size and environmental conditions. Birds should never be without feed. When blended feed runs low, prepare a new batch of feed based on the age of the birds.*
