

HST Water Supplement

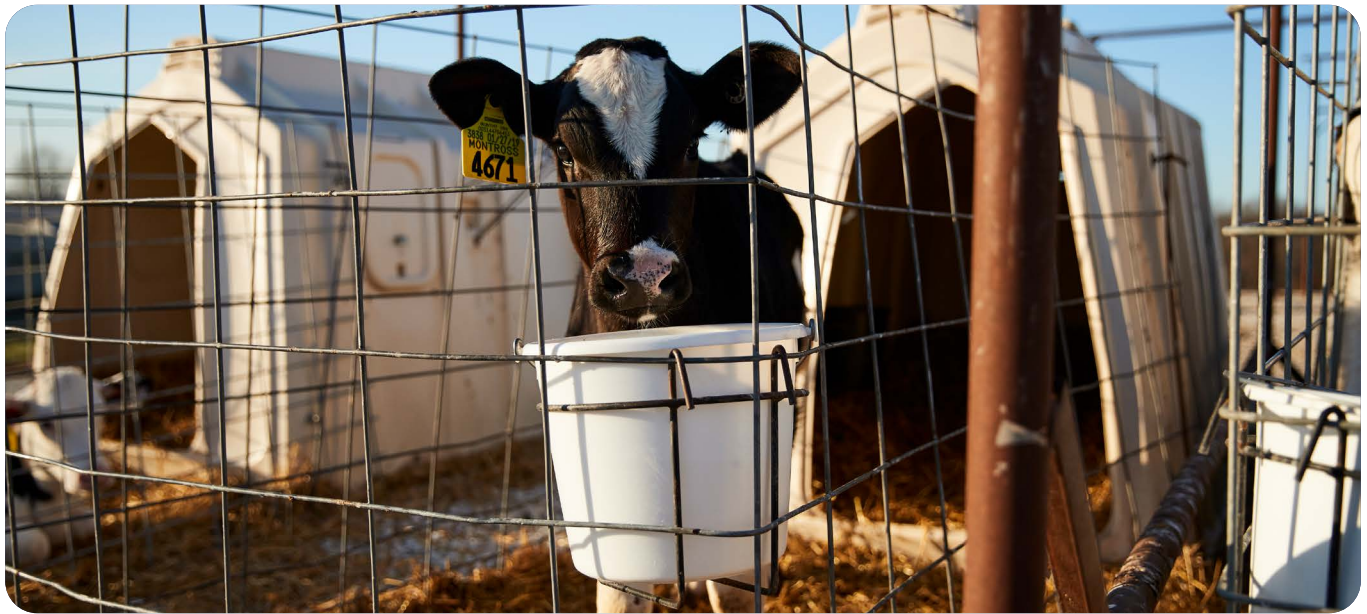

A gut health and hydration supplement for livestock.

- Isotonic formulation helps ensure optimal hydration.
- Gut integrity and microbiome balance is maintained due to the incorporation of prebiotics, vitamins and minerals.
- Higher fluid intake and starter feed consumption is proven, which can help support increased performance.

Uniquely designed for young animals to proactively support hydration and gut health, HST Water Supplement keeps animals performing their best in high-stress situations including heat stress, transportation stress and show or housing changes.

HST contains Fulfill® Prebiotic, Fructooligosaccharides (FOS) prebiotic and saccharin, along with magnesium, vitamin C and B vitamins to support gut health, stress management, tissue health and rehydration.

| IMPACT | BENEFIT |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------|
| Isotonic formulation | ✓ Helps ensure better hydration without requiring additional water intake. |
| Optimized gut health | ✓ Maintains a healthy gut microbiome and supports immune health. |
| Enhanced palatability | ✓ Improved palatability over water alone results in animals increasing total fluid consumption, supporting hydration. |
| Sustained hydration | ✓ Shown to effectively rehydrate after a period of dehydration. |
| Greater feed intake | ✓ Has been shown to increase the intake of starter feed in young calves. |

Feeding directions

Stress support for calves:

Feed 2 qts. (1.9 L) mixed up to twice per day, between milk replacer feedings, to increase feed and water intake during stressful times.

Boost for cattle (more than 200 lbs.):

Provide 2-5 gal. of solution daily, along with free-choice water, to help cattle maintain hydration and nutrient intake during periods of stress.

Also for use in goats and lambs. See tag for feeding directions.

HST Water Supplement is not a replacement for milk or milk replacer. Continue feeding milk/replacer while using this product.

Let's chat about a young animal program to meet your operation's goals.
