1. Use **High Octane® Powerfill®** supplement to manage weight gain and keep pigs looking great if needed to slow growth.
2. Use **High Octane® Champion Drive™ Topdress** as needed to optimize muscle (1/2 to 1 lbs/day).
3. Use **High Octane® Power Fuel®** supplement as needed for cover and muscle, and to support overall health (1/2 to 1 lbs/day).
4. Use **High Octane® Fitter 35®** supplement as needed to optimize muscle and leanness (1 to 2 lbs/day). For limiting weight gain and optimizing muscle and leanness, feed 3 lbs per day as the sole diet.
5. Growth performance can vary depending upon genetics, environment, management, facilities, and immune status. The above figures are estimates only and do not reflect a guarantee of performance.
6. Consider lowering protein and increasing energy when muscle becomes too extreme, body condition too lean, or the pig has structural issues.
7. If help is needed with rib shape, add 8 oz per day of **High Octane® Depth Charge®** supplement to regular feed. **High Octane® Depth Charge®** supplement can be used to keep pigs full when being limit fed as well.
8. Add **High Octane® Showpig Paylean® Premix** at the 4.5 to 9 grams/ton level during the final 45 - 90 lbs of weight gain for optimal growth and muscle development.
9. Deworm pigs thoroughly and effectively about every 30 to 45 days throughout the growing season.
10. To help support feed intake feed 4 oz. per day **High Octane® Heavy Weight®** supplement, to help optimize fat cover and or growth rate feed 4 to 16 oz. per day.
11. To help with flank and lower 1/3 of body, feed 1 to 3 lbs per day **High Octane® Ultra Full®** supplement.
12. Use **High Octane® Fitter® 52** supplement final 14 to 21 days at 1 lbs per day to dean up frontends and help add muscle.
13. Use **High Octane® Alleviate®** supplement to help support gastric comfort at 2 oz per every 50 lbs of bodyweight per day.
